Company description :

Airbus Group est un leader mondial de l'aéronautique, de l'espace et des services associés. En 2014, le Groupe - qui comprend Airbus, Airbus Defence and Space et Airbus Helicopters - a réalisé un chiffre d'affaires de 60,7 milliards d'euros avec un effectif d'environ 138 600 personnes.

Job description :

For the follow-up of NATO codification work carried out by an external service provider, you will be responsible for upgrading the tool used to steer its performance and also the internal performance of the AH NATO Codification Cell. This tool was developed in 2015 and requires an additional phase to add specific modules.

Required profile :

You are in the 1st or 2nd year of a Master's degree or in the 4th/5th year of engineering school, university or equivalent,

specialising in Information Technology and Tool Development/Management/Creation.

You ideally have initial experience in this field and skills in:

- Project management (schedules and budgets)

- IT/Programming.

You have knowledge in web programming including ANGULAR JS, HTML and CSS Bootstrap.

You are proficient in:

- Spring framework (Spring Boot)

- JPA, Hibernate, Spring MVC.

You have solid knowledge in database creation and management (MySQL, etc.).

You are a good team player and have excellent interpersonal skills.

English: advanced level

French: fluent.
