**Company description :**

PwC Luxembourg ([www.pwc.lu](http://www.pwc.lu)) est le premier cabinet de services professionnels au Luxembourg, employant 2450 personnes originaires de 55 pays différents. PwC Luxembourg fournit des services en matière d'audit, de fiscalité et de conseil, comprenant notamment des services de conseils en gestion, en transactions, en financement ainsi que des services de conseils portant sur des aspects réglementaires. La firme fournit ces conseils à une clientèle très variée allant des entrepreneurs locaux et des PME aux grandes multinationales ayant leurs activités au Luxembourg et dans la Grande Région. La firme aide ses clients à créer la valeur qu'ils recherchent en contribuant au bon fonctionnement des marchés de capitaux et en fournissant des conseils privilégiant une approche sectorielle.

Le réseau international PwC est le plus important prestataire de services professionnels dans les domaines de l'audit, du conseil fiscal et du conseil en gestion. Nous sommes un réseau de firmes indépendantes présentes dans 157 pays et comptons plus de 195 000 collaborateurs. Faites-nous part de vos enjeux et consultez nos sites de référence : [www.pwc.lu](http://www.pwc.lu) et [www.pwc.lu](http://www.pwc.lu) pour davantage de précisions.

**Job description :**

order to meet growing demand within the Commercial Companies division of our Consulting department, we are looking to hire talented people to join our teams of experts and develop their skills in a fast-moving and fulfilling work environment.

Part of the Digital Services Advisory department, you will take part assignments in the fields of transformation and digital innovation (statistical analysis of data, anomaly detection, predictive analysis, data visualisation, etc.) for our clients in Luxembourg and the Greater Region. You will work on innovative topics such as cloud computing, connected objects and mobile.

Your main duties will be:

- Taking part in assignments such as data analytics interpretation, anomaly detection, quantitative research, etc.;
- Providing support for big data analytics for commercial companies;
- Assisting consultants with client development;
- Helping to organise internal events.

**Required profile :**

- You are completing a Master's degree in Maths or Computer Science and are looking for a 6 month internship;
- You are interested in big data analytics, quantitative data and statistics;
- You master Excel, Access, structured databases (SQL) and data visualisation;
- You are comfortable using languages for statistical computing: R, ACL, Python, SAS, etc.;
- You can work independently and are able to juggle priorities;
- A good knowledge of the economic landscape in Luxembourg would be an asset;
- You speak a high level of English and French (any other language, especially German or Luxembourgish, would be an advantage).
