Job description :

As a Junior Data Analytics Consultant, you will:

- * Determine functional requirements for application design
- * Design specifications and draw up technical documentation and reports
- * Participate in application building, testing, and deployment activities
- * Develop and test detailed functional designs for business solution components
- * Participate in test planning and execution

Required profile :

To be the right fit for this position, you have to have:

- * A Master degree (Bac+4/5) in information technology or computer science
- * A Proactive and dynamic attitude, you pay attention to detail and have a client-orientated approach
- * People skills that will enable you to build lasting and trusting relationships with our clients and company teams
- * Fluency in English and French; German will be considered an asset
